

UNIVERSITY OF GOTHENBURG

POST-DOCTORAL STIPEND

Pilon Lab, Göteborg University, Sweden

A post-doctoral position is available immediately in the lab of Marc Pilon to study the developmental genetics of the pharynx and/or the developmental genetics of fat stores in *C. elegans*. The research will build on ongoing and past research. Please consult the lab's website for more information about our research:

http://www.molbio.gu.se/staff/molmpi/Marc_Pages/Pilon_Home.html

It would be an advantage for the successful applicant to have experience in *C. elegans* genetics, microscopy and molecular biology. For an applicant to qualify, his/her Ph.D. exam must not be older than 2 years by the time that the position begins. The stipend is for one year, and is extendable to a second year.

Department

The Department of Cell and Molecular Biology at Göteborg University houses about 20 research groups working on a variety of subjects ranging from marine biology to yeast stress resistance and mouse and *C. elegans* developmental genetics. Many other developmental geneticists are located in the neighboring Medical Genetics department, making Göteborg an interesting place to do a post-doc.

Application

The application should contain the following items:

- Curriculum vitae including publication record
- Short letter describing the applicant's research interests
- Contacts to two references

Send the application before April 30/2010 to:

Marc Pilon,
Dept Cell Mol Biol, Göteborg University
Medicinaregatan 9C
S-405 30 Göteborg, Sweden
